

La Liga Prediction

GALDO SEARA Luis GONZALEZ HUESCA Juan Manuel

Agenda

- Introduction
- Background
- Analysis and design
- Implementation
- Testing and results
- Conclusion
- Demo
- Q&A

Introduction

- Design choices
- Difficulties
- Novelty
- What we learned?

Background

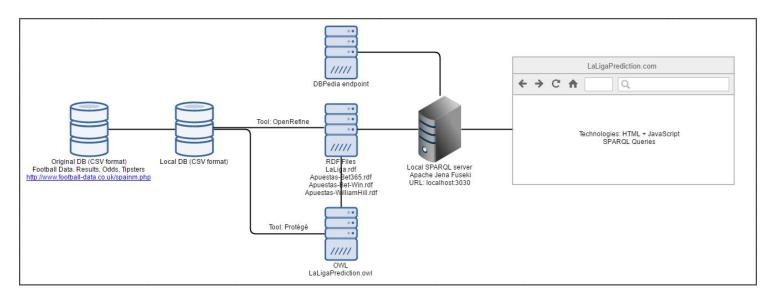

- Related work
- Problem being solved
- Web 3.0
- External influences

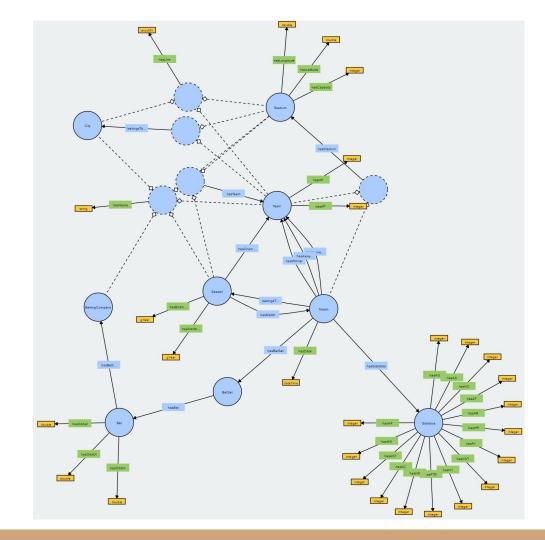

Analysis and Design

- Statistical Data (CSV -> RDF), DBPedia
- SPARQL Server
- HTML with JavaScript

Implementation

- CSV database (Football Data)
- Ontology OWL
- RDF files
- Algorithms

Testing and results

- Individual Comparison
- Group Comparison
- Prediction
- Inferences

Conclusion

- Introducing online gambling to web 3.0
- Benefits of the semantic web
- Evaluation
- Next steps
 - Improve the prediction algorithm
 - Increase the ontology including more sports
